

Green Format Review

GreenFormat is an information organizing tool developed by members of the Construction Specifications Institute (CSI) to communicate the sustainability features of building materials, products and systems. GreenFormat addresses the information needs of numerous stakeholders in the construction industry including design professionals, suppliers, and other influencers including building owners, constructors and regulators.

GreenFormat v2.0 draft

The current [GreenFormat v2.0 draft is now open for review](#). This draft includes an outline with the most up to date categories and subcategories, information on the structure of GreenFormat, and the use of GreenFormat category levels. Main changes and updates include:

- A shift to a **nine-point format**: Three apply to products, three apply to the manufacturers who make them, and there are three more for expansion.
- GreenFormat is not a product listing website, but is an **information format**.

Providing Commentary

If you would like to provide specific feedback and/or commentary on the [GreenFormat v2.0 Outline](#), send all comments to CSI Technical Services Manager Chris Gummo:

- Reply back to cgummo@csinet.org and attach a separate document (Word or Excel) with your included feedback and/or commentary, citing specific areas in the document to which they relate
- Reply back to cgummo@csinet.org and attach a PDF with feedback and/or commentary included on the original document
- Reply back to cgummo@csinet.org with your feedback and/or commentary in the body of the email, citing specific areas in the document to which they relate

The review period will be open until **February 28th 2014**. Learn more about [GreenFormat](#).
